Professional Profile

I believe writing every single line of code from scratch isn't always the smartest path when delivery time, efficiency, and costs matter. That's why I've adapted to modern industry shifts by combining solid engineering foundations (Java, C++, and database design) with AI-assisted workflows and smart orchestration. I build and deliver real tools faster, keeping a strong focus on understanding how things work underneath rather than losing sight of core engineering principles.

Technical Skills

- **Proficient Languages:** Java, C++
- **Working Knowledge:** SQL, Bash Scripting, Python, TypeScript
- **AI & Machine Learning:** Machine Learning, Advanced Prompt Engineering, Guardrails, AI Orchestration
- **Data Systems:** ETL Pipelines, Informatica PowerCenter, Teradata, GraphQL, API Integration
- **Tools & Frameworks:** GitHub, Docker, Linux, Relational Databases

Experience

Civica — *Granada, Andalusia, Spain*
Data Engineering Intern — February 2026 – August 2026

- Developed and maintained ETL pipelines using **Informatica PowerCenter** connected to **Teradata** databases for ABANCA over 6 months.
- Focused on large-scale data integration, workflow design, and data processing in a corporate banking environment.

T-Systems Iberia — *Granada, Andalusia, Spain*
Software Engineering Intern — Mar 2022 – Jun 2022

- Developed backend services and schemas using **GraphQL** and **Node.js** for the internal Desk ticket management platform.
- Designed and tested API queries, mutations, and database integrations to streamline technical support workflows.

Projects

AI-Assisted Portfolio Suite (Portfolio Link) — *Web / AI Deployment*
Tech: Modern Web Stack, AI Orchestration, Prompt Engineering

- Rapidly delivered practical applications (**F1-BUGAMBRA**, **GmailKeep Personal**, **SmartFruitClassifier**, **CleverTracker & Ipo Study Lab**), balancing cost-effective delivery with modern features.

DIVINANDO (FP Final Degree Project) — *GitHub: ajgarciarias10/DIVINANDO*
Tech: Java, C++, Relational Databases

- Coded entirely from scratch as a vocational capstone project, demonstrating strong core logic and problem-solving.

Education

Universidad de Jaén — *Jaén, Spain*
Bachelor of Computer Engineering — Sep 2022 – Jun 2027

Instituto Superior de Engenharia de Coimbra (ISEC) — *Coimbra, Portugal*
Bachelor of Engineering (mobility program) — Sep 2025 – Feb 2026

IES Zaidín Vergeles — *Granada, Spain*
Higher National Diploma in Multiplatform Application Development (DAM) — 2020 – May 2022

Certifications & Languages

- **Certifications:** Advanced Cybersecurity in Operational Technology Environments; Master E-commerce from Scratch; Create a Website from Scratch with AI.
- **Languages:** Spanish (Native), English (B2 First Certificate | Preparing C1 Advanced).
